Average session
42 min

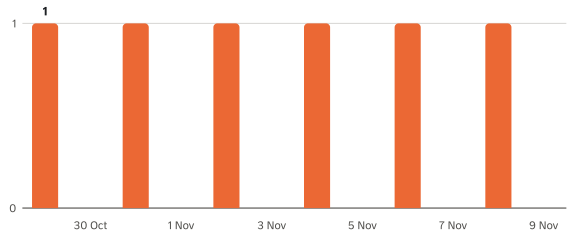

Bugs filed
6

Pages tested
13%
2 of 15 pages

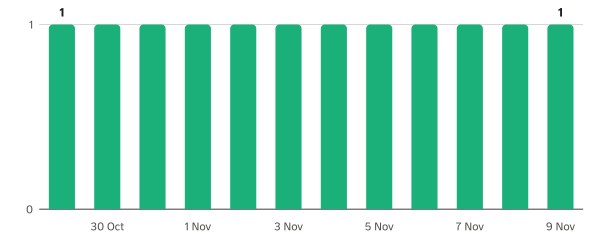

Time spent testing per day (min)

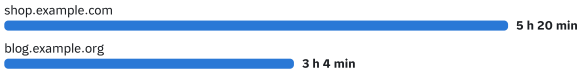

Bugs filed per day

Sessions per day

Time per site

Page coverage per site

Tested (at least one recorded action)

Not tested yet

Pages are what your sessions visited plus the same-site links found by a link check. Where no link check was run, pages are only the ones you visited. Run a link check to discover pages you have not opened.

Bugs by severity

- Only notes you filed as a bug are counted. Console errors, failed requests and other note types are not.
- Notes do not store a severity yet, so bugs show as Not rated unless one was set.

- A session's time is split across the sites it visited by their share of navigations and actions, and it counts on the day it started.
